# Iranian lithium batteries as outdoor power sources

## Overview

---

Can India use Iran's lithium reserves to develop a grid-scale battery system?

As India strives to transition to renewable energy sources and reduce its carbon footprint, access to lithium reserves from Iran could facilitate the development and deployment of energy storage solutions, such as grid-scale batteries and off-grid systems.

Will Iran be the first entrant to lithium?

As the Middle East's first entrant into lithium, all eyes will be on Iran. Finding lithium in the region indicates that the middle east mining sector may become a new and key player supplying battery metals and critical minerals contributing to the global battery and electric mobility ecosystem.

What can Iran do with the lithium discovery in Iran?

The lithium discovery in Iran is expected to redirect focus toward mining activities in the Middle East. Iran can leverage this discovery to persuade Western nations, such as the USA and the EU countries, to lift sanctions imposed for its nuclear program, support for terrorism, and human rights violations.

Does Iran have a tenth of the world's lithium supply?

With global Lithium reserves estimated at 89 million tons, Iran may possibly possess almost one tenth of the world's Lithium supply." Iran's recent Lithium discovery will shift more attention to mining in the Middle East. Why?

.

Is there a lithium reserve in Iran?

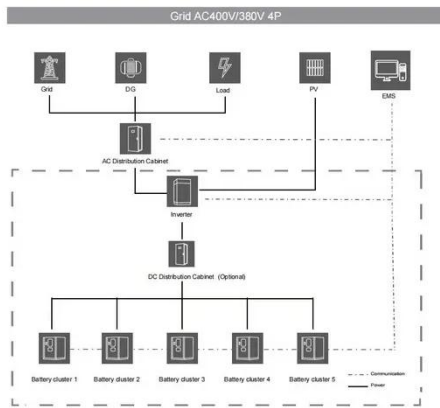

Ebrahim Ali Molabeigi Iran's minister of Industry announces "the discovery of the first lithium reserve estimated to be 8.5 million tonnes of lithium carbonate equivalent (LCE) in Hamedan province signalling positive news of

the possibility of other reserves in the western Iranian region”.

How will Iran's lithium deposits impact global competition?

The announcement of lithium deposits in Iran is likely to impact the global competition for lithium resources significantly. It holds the power to disrupt the existing power dynamics in the global lithium race, as it is estimated to be the second-largest lithium reserve in the world after Chile.
