

SolarMax Energy Systems

Ireland s largest new energy storage project

Overview

ESB has today opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy storage to help provide grid stability and deliver more renewable power onto Ireland's electricity system. What will ESB's new battery plant do for Ireland?

ESB, the state-owned electricity company, has announced the opening of a major battery plant at its site in Poolbeg, Dublin. The battery plant will add around 75MW of fast-acting energy storage to make the grid in Ireland more stable and increase the share of renewables in the electricity system.

How many battery storage projects are there in Ireland?

More currently, according to our colleagues at Solar Media Market Research, which produces the Republic of Ireland Battery Storage Project Database Report, there are now 545MW and 609MWh of utility-scale BESS projects already operational in the Republic of Ireland.

How does electricity storage work in Ireland?

For context, peak demand on Ireland's electricity system is approximately 5.5 GW. Electricity storage systems such as utility-scale battery projects also provide essential backup services to the grid that help to keep the electricity supply secure, reduces carbon emissions and ultimately reduces costs to the consumer.

Why is RWE renewables launching a battery storage business in Ireland?

Ireland already relies heavily on renewables, and targeted funding is available for battery storage systems. The country is therefore the ideal basis for RWE Renewables to further expand its battery storage technology business and drive the energy transition."

How much energy will ESB provide to Ireland's Electricity System?

Image: Fennell Photography Operational since November last year, the project

has the capacity to provide 75MW of energy to Ireland's electricity system for around two hours. ESB, the state-owned electricity company, has announced the opening of a major battery plant at its site in Poolbeg, Dublin.

Where is ESB delivering a new battery energy storage system?

This latest battery energy storage system (BESS), currently the largest site of its kind in commercial operation in Ireland, is part of ESB's pipeline of projects which are being delivered at sites in Dublin and Cork – representing an investment of up to €300m.
