

SolarMax Energy Systems

Ireland s new energy storage requirements

Overview

Actions #7 to #10 of the policy framework will establish the optimal (long duration) electricity storage requirements to meet climate targets and electricity grid network expansion between 2030 and 2040, through a 'Quantity' Consultation (Action #7); a 'Financial' consultation (Action #8); and if required a 'Market framework' (Action #9) and a further a 'Route to market' (Action #10) before the end of 2028. What is the electricity storage policy framework for Ireland?

In line with CAP Action EL/24/16, the Electricity Storage Policy Framework for Ireland (ESPF) was published by my Department in July 2024. The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition.

Does Ireland need an energy storage policy?

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points:.

What is Ireland's energy policy?

The policy sets out 10 policy actions, which include the following proposed key actions: Electricity storage system operators are to be given access to all wholesale electricity markets in Ireland.

Should 'long duration' electricity storage systems be integrated into Ireland's Electricity Grid?

In this regard, greater emphasis is placed on ensuring 'long duration' electricity storage systems – systems that have the capacity to deliver electricity throughout at least a four-hour period – are integrated into Ireland's electricity grid.

What is Ireland's energy transition policy framework?

The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Actions #6 to #10 of the policy framework are designed to stimulate the development of the optimum level of electricity storage systems, including Long Duration Electricity Storage on to the grid network by 2040.

What is Ireland doing about battery & storage?

With a recent policy statement, Ireland is seeking to accelerate the growth and integration of battery and other storage systems into Ireland's electricity grid.
