Irish Energy Storage Project Cooperation

Overview

Is Ireland a game changer for long duration energy storage?

Ireland – A Game Changer for Long Duration Energy Storage?

This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Does Ireland need an energy storage policy?

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points:.

When will long duration energy storage be available in Ireland?

The Irish Electricity Storage Policy Framework, published after this data was collected, indicates that an immediate route to market for 500 MW of long duration energy storage is currently being developed, with further studies planned to support long duration storage from 2030 to 2040 (Government Of Ireland 2024a).

What is Ireland's energy storage strategy?

As part of the energy storage strategy, identify Ireland's competitive advanced capabilities such as our renewable and digital technologies sector and how these can be leveraged to create additional adjacent job opportunities. Promote public and private sector participation in EU and international research and skills development programmes.

What is Ireland's Electricity storage policy framework?

The policy framework is a first of kind policy, which clarifies the key role of electricity storage in Ireland's transition to an electricity-led system, supporting Ireland's 2030 climate targets, it may be considered as a steppingstone on Ireland's path to net zero carbon emissions.

How can the Irish government support the development of energy storage skills?

The Irish government has launched several initiatives to support the development of skills in the energy storage sector. For example, the government's Skills to Advance initiative provides funding to support upskilling and reskilling of workers in areas such as energy storage.
