

SolarMax Energy Systems

Is Kenya s outdoor power supply self-operated authentic

Overview

Who owns the power in Kenya?

Around a third of Kenya's installed capacity is owned and operated by independent power producers (IPP) across several plants, including small-scale hydro, geothermal, biomass, wind, solar, and heavy fuel oil plants. The remaining capacity is owned and operated by Kenya Electricity Generating Company (KenGen), which is 70% government owned.

Who regulates the Kenyan electricity sector?

The key public-sector institutions involved in managing and regulating the Kenyan electricity sector are the Ministry of Energy and Petroleum, the Energy and Petroleum Regulatory Authority (EPRA), KPLC, Kenya Electricity Generation Company (KenGen), the Geothermal Development Company, the Kenya Electricity Transmission Company (KETRACO), and REREC.

Which energy sources are used in Kenya?

Approximately 90% of Kenya's electricity is generated from renewable/clean energy sources. Of these, geothermal remains the most significant source with an estimated potential of 10,000MW, but it remains relatively unexploited with a current installed capacity of less than 985MW. Kenya is the seventh largest geothermal producer in the world.

What are Kenya's Commercial opportunities?

The sector presents commercial opportunities, especially in renewable sources like geothermal, solar, and wind. Around a third of Kenya's installed capacity is owned and operated by independent power producers (IPP) across several plants, including small-scale hydro, geothermal, biomass, wind, solar, and heavy fuel oil plants.

Will Kenya become a nuclear power producer?

In December 2022, the U.S. and Kenya signed a Nuclear Cooperation MoU,

which opens the door for U.S. industry to engage and share information with Kenya on technology for nuclear power production. Kenya plans to become a nuclear power producer by 2036 and is working together with the International Atomic Energy Association as it builds capacity.

How has KPLC accelerated rural electrification in Kenya?

Impressively, KPLC more than doubled access from 26% of households in 2013 to 77% in 2018, meeting best-in-class benchmarks globally. KPLC has been assisted in this effort by the Rural Electrification and Renewable Energy Corporation (REREC). Founded in 2006, REREC's mandate has been to accelerate the pace of rural electrification across Kenya.
