

## SolarMax Energy Systems

# Is Turkmenistan suitable for energy storage projects

## Overview

---

What is a 100 MW solar installation project in Turkmenistan?

100 MW Solar Photovoltaic Installation Project: Masdar and Turkmenenergo signed a joint development agreement for a solar park, following a memorandum in October 2021 to explore low-carbon energy potential in Turkmenistan.

What is the future of electricity production in Turkmenistan?

Future Electricity Production: Expected to rise to 35,500 GWh by 2030, a 57.5% increase from electricity production in 2021 (22,533 GWh). Having the second most energy-intensive economy in the world, Turkmenistan's low energy efficiency and outdated oil and gas infrastructure contribute to its significant methane emissions.

How can Turkmenistan meet its climate commitments?

To meet its climate commitments under the Paris Agreement and the Global Methane Pledge, Turkmenistan must enhance energy efficiency, reduce methane emissions, and invest in renewable energy. Addressing inefficiencies in the oil and gas sectors is crucial, as outdated infrastructure leads to significant methane leaks.

What is the solar potential of Turkmenistan?

Average Theoretical Solar Potential: 4.4 kWh/m<sup>2</sup>, roughly 655 GW of additional capacity. Potential: Turkmenistan, with the world's fourth-largest natural gas reserves, is strategically positioned for hydrogen energy development, as 68% of global hydrogen production is derived from natural gas, making it the most cost-effective method.

Is Turkmenistan a good place to develop hydrogen energy?

Potential: Turkmenistan, with the world's fourth-largest natural gas reserves, is strategically positioned for hydrogen energy development, as 68% of global

hydrogen production is derived from natural gas, making it the most cost-effective method. Estimated Production: 1.82-5.76 Mt per annum by 2040.

Why is Turkmenistan reducing its methane emissions?

Having the second most energy-intensive economy in the world, Turkmenistan's low energy efficiency and outdated oil and gas infrastructure contribute to its significant methane emissions. Turkmenistan has demonstrated its commitment to reducing its exorbitant methane emissions by joining the Global Methane Pledge.
