Is the outdoor power supply AC

Overview

What is a ses AC/DC outdoor UPS?

The SES AC/DC Outdoor UPS™ system enclosure is powder coated white for cooler summer operation, and includes Goretex battery breather vents. Our systems produce clean, uninterrupted power for critical AC and/or DC loads. In the event of AC (utility) power loss, the UPS-AC/DC Outdoor supplies back-up power for 24-48 hours, or longer if requested.

What types of AC systems are available?

AC systems are available in 120 VAC configurations. Each compact battery charging system assembly features automatic boost/float temperature compensated charging, a low voltage disconnect and programmable alarm contacts. AC systems feature an industrial quality pure-sine DC to AC inverter for AC loads.

Why does my power supply keep shutting down?

Notice: Please make sure to place the power supply in a well-ventilated environment to efficiently lower its operating temperature. Otherwise, there's a possibility of triggering the over-temperature protection, causing the power supply to temporarily shut down. Once the temperature has cooled down, you can resume using it.

Is the outdoor power supply AC
