Israel photovoltaic power station inverter

Overview

Additionally, Herzliya based SolarEdge has become a market leader in inverters for non-utility scale photovoltaic solar power. In 2009, Israel found natural gas reserves within their exclusive economic zone which may reduce urgency of solar development. Overview The use of began in in the 1950s with the development by of a solar water heater to address the energy shortages that plagued the new country. By 1967 around 5% of water of household.

In 1949, the prime minister, , offered Harry Zvi Tabor a job on the 'physics and engineering desk' of the Research Council of Israel, which he accepted. He created an Israeli national laboratory.

On 2 June 2008, the Israeli Public Utility Authority approved a for solar plants. The tariff is limited to a total installation of 50 MW during 7 years , whichever is reached first, with a maximum of 15.
