

## SolarMax Energy Systems

# Italian 5G communication base station inverter project

## Overview

---

What is a 5G infrastructure project in Italy?

In 2022, the Italian government announced a 5G infrastructure programme funded by the EU Recovery and Resilience Facility (RRF). Under this proposal, INWIT Infrastructure Wireless, a joint venture between Italian mobile operators Vodafone and TIM, has won six lots of funding with a combined value of EUR 345m (USD 359m).

When did 5G start in Italy?

In 2020 TIM and Ericsson launched 5G connected technologies at the Leonardo da Vinci Fiumicino Airport in Rome. In 2021 the government assigned EUR 2.02bn (USD 2.10bn) from the Italian Recovery and Resilience Plan to the application of the 5G Italy Plan.

What is a 5G radio access network?

The 5G Radio Access Network (RAN) is the interface between user devices and the 5G core network. It comprises base stations and small cells that manage radio communications, enabling ultra-fast data transfer and low-latency connections.

How 5G technology is transforming connectivity?

5G technology is revolutionizing connectivity, and the manufacturers of 5G equipment are leading this transformation. From modems and base stations to RAN, antenna arrays, and core networks, these companies are providing cutting-edge solutions. Leading vendors are offering innovative products to enhance network speed, coverage, and efficiency.

What is a 5G NR Network?

As defined in 3GPP TS 38.300, the 5G NR network consists of NG RAN (Next Generation Radio Access Network) and 5GC (5G Core Network). As shown, NG-RAN is composed of gNBs (i.e., 5G Base stations) and ng-eNBs (i.e., LTE base

stations). The figure above depicts the overall architecture of a 5G NR system and its components.

What is a 5G base station?

5G base stations operate on various frequency bands, including sub-6 GHz and mmWave, to deliver ultra-low latency, high data throughput, and enhanced capacity. They support massive MIMO (Multiple Input Multiple Output) technology, enabling improved coverage and simultaneous connections for a large number of devices.
