

SolarMax Energy Systems

Italian bifacial solar panels wholesale

Overview

Who makes BIPV solar panels for Italy?

Ciao! Building integrated photovoltaics (BIPV) manufacturer for Italy Metsolar produces unlimited variety of tailored BIPV solar panels for Italy, that are efficient, cost competitive and have exclusive design possibilities.

What are bifacial solar panels?

Bifacial solar panels are made up of monocrystalline or polycrystalline cells. Most bifacial solar panels use monocrystalline cells, which are the most efficient but also the most expensive.

Are bifacial solar panels cheaper than monofacial panels?

By that standard, a bifacial solar panel turns out to be even cheaper than a monofacial solar panel because once the investment cost will break even, bifacial panel will continue generating more power than monofacial panels ever can, which, in turn, will result in a lot more savings than an initially cheaper monofacial panel can ever provide.

Does metsolar offer a custom solar solution for BIPV in Italy?

Metsolar can offer one of a kind design, □ custom shaped and sized solar solutions for BIPV in Italy.

Who makes solar panels & facades?

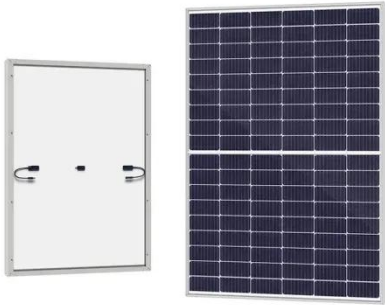

Roofs and facades truly stand out with modules produced using colored glass by Kromatix™ (solar glass innovated by SwissINSO) or technology by Solaxess, where solar cells are almost invisible. Metsolar is European manufacturer with exclusive manufacturing possibilities.

Which solar panels can be produced with full or cut solar cells?

All our PV products can be produced with full or cut solar cells as per demand.

Metsolar manufactures standard glass/ glass, glass/ backsheet BIPV solar panel options with possibility for variations in size, shape, transparency, JB, etc. For seamless integration and blending design.
