

SolarMax Energy Systems

Italian industrial energy storage battery exports

Overview

Does Italy have a battery storage market?

The research and analysis conducted for this report were supported by the European Climate Foundation. This report is part of a series that analyses the battery storage market in select European countries. Italy has both a rapidly growing utility-scale market as well as a flourishing customer-sited battery storage market.

How many GW of battery energy storage systems are there in Italy?

Analyst Aurora Energy Research tells pv magazine Italia 3 GW of battery energy storage systems (BESS) are at an advanced stage in Italy and expected online within three years.

Which country has a strong battery industry after Italy?

“After Italy, the UK follows, supported by a strong installed capacity of 4.3 GW, an established battery industry which is estimated to more than double to 10.6 GW, and attractive revenue streams that strengthen its position,” the consultancy has stated.

Why is Customer-Sited storage so popular in Italy?

Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives. For utility-scale systems, Italy has established favourable electricity market rules that enable projects to earn revenues from a range of different sources.
