

SolarMax Energy Systems

Jamaica bifacial solar panel specifications

Overview

How efficient are bifacial solar panels?

The efficiency of this model reaches 21.2% — well above the market's average. And while conventional panels use only one side to absorb photons, bifacial modules employ both sides at the same time. Thanks to the technology, this model can be up to 30% more efficient. JA Solar provides a 12-year product warranty.

What are ja bifacial modules?

JA bifacial modules are assembled by high-performance PERCIUM encapsulated by glass-glass panels, are capable of converting energy from lights on front and diffuse light, as well as reflected and scattered light on which make them better reliability, superior low irradiance performance, excellent energy generation performance.

How long does a JA Solar solar panel last?

Slow degradation over the next 30 years is guaranteed by JA Solar. The performance will decrease no more than 2% during the first year and 0.25% annually thereafter. Your modules will retain at least 85.24% of original performance after the 30 years are over. This 550 W JA Solar solar panel also comes with a generous 12-year product warranty.

What is the warranty period for JA Solar panels?

JA Solar photo-voltaic panels are economical & high in quality, efficiency and appearance. They are manufactured with first world specifications and covered by 15 years manufacturer's warranty. SALE PRICE! \$33,800 JMD IN-STOCK NOW! The 550W 'Canadian Solar' grade 'A' mono photo-voltaic panels are far superior in quality, efficiency and appearance.

What makes JA Solar a good solar system?

To further boost the performance, JA Solar employs half-cut cell technology.

Each of the panel's 44 cells is only half the size of a traditional solar cell. This grants JAM72-D30 lower resistive losses and better shade tolerance. The efficiency of this model reaches 21.2% — well above the market's average.
