

SolarMax Energy Systems

Kenya 100MW energy storage project

Overview

Who is the implementing agency for the Kenyan battery energy storage system?

The Kenya Electricity Generating Company PLC (KenGen), has been designated to be the Implementing Agency for the Kenyan Battery Energy Storage System (BESS), which is part of the Kenya Green and Resilient Expansion of Energy (GREEN) program, funded by the World Bank.

Does Kenya need battery energy storage?

A battery energy storage. The question of power storage has become critical as Kenya embraces e-mobility which requires reliable power supplies. The Energy and Petroleum ministry targets to mainstream power storage in its electricity master plan as the country's renewable energy generation expands.

Will Kengen implement a 100MW Bess project in 2024?

KenGen has announced that it will implement an initial 100MW BESS project as part of the World Bank funded GREEN program in early 2024. The BESS project has been identified as a possible solution to increased proportion of intermittent energy to the Kenyan power system and energy curtailment during off peak hours.

Can a 50MW wind power plant be built in Kenya?

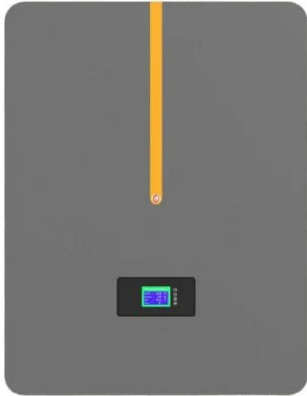

Separately on September 9, 2019, the US Trade and Development Agency awarded a grant to Kenya's Craftskills Energy Limited for a feasibility study by an American firm, Delphos International for the development of a 50MW wind power plant with integrated battery storage capacity in Kenya.

How many mw can a Kenyan interconnection provide?

While the interconnection has a transfer capacity of up to 2,000MW, transmission system constraints in Kenya currently limit offtake to only

200MW. Urgent investments are needed to address reactive power deficiencies and increase transfer capacity in the Kenya system to reap the full benefits from the interconnection. 4.
