≥6000 Cycle Life

Overview

Where are solar power plants located in South America?

No wonder that South America's first solar thermal power plant (Cerro Dominador Solar Complex) was connected to the grid here in 2021. Most of the electricity is needed in the centre of Chile, as here in the capital Santiago de Chile. The sunlight in the Atacama Desert is particularly intense.

Is solar energy a good investment in South America?

As a result, the preliminary energy balance for 2019 showed favorable results, showing that the share of fossil fuels is only 2%, being the smallest percentage in the region and the share of PV solar energy reaches 3%, being the second-largest participation in South America after Chile .

Is South America's largest country investing in wind and solar power?

Therefore, South America's largest country has been investing in the expansion of wind and solar power for years. Currently, with 27 gigawatts of installed capacity the share is still around 10 percent. But if you look at the new investments planned for wind power plants, the country ranks fifth worldwide.
