Latest on Taipei Grid Energy Storage Policy

Overview

Does Taiwan have a grid resilience plan?

Taiwan is engaged in a multifront effort to add resilience to its electrical grid. The centerpiece of this campaign is the Grid Resilience Strengthening Construction Plan (電力系統韌性強化計畫), announced by Taiwan Power Company (Taipower, 台灣電力) in September 2022.

Why are stable energy storage solutions important in Taiwan?

As Taiwan's renewable energy share continues to grow, stable energy storage solutions are becoming increasingly vital to offset fluctuations in solar and wind power generation.

What is E-dreg energy storage facility?

Billion Watts Launches 64MW E-dReg Energy Storage Facility, Strengthening Taiwan's Grid Stability Strategically located within an industrial zone, the facility plays a crucial role in energy shifting and frequency regulation, participating in Taiwan Power Company's E-dReg ancillary services market.

How will Taipower resilience strengthen the grid?

To avoid such chain reactions in the future, Taipower has instituted the Grid Resilience Strengthening Construction Plan for “promoting distributed grid projects,” “improving grid reinforcement projects,” and “strengthening grid protection capabilities.” The total investment of NTD \$564.5 billion will come in installments over 10 years.

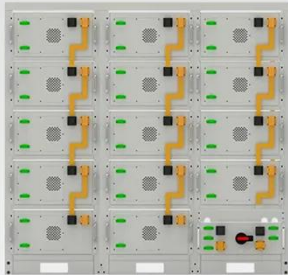

What is a “problem-solving” oriented smart grid master plan?

The Smart Grid Master Plan The “Problem-solving” -oriented smart grid master plan amendment was approved by Executive Yuan of Taiwan in 2019. The amendment was based on the power grid stability with 20% of renewable energy in 2025, taking into account the power supply quality, user services and other directions.

How much does Taipower spend on net-zero energy projects?

In response, Taipower has allocated NT\$62.6 billion in its 2025 budget for net-zero initiatives, focusing on renewable energy projects, energy storage, and smart grid deployment. Despite funding constraints, industry experts see grid modernization as an unstoppable trend, driven by the ongoing expansion of renewable energy.

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locates PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
