

SolarMax Energy Systems

Latvian base station distribution box

Overview

Does Latvia have a 330 kV power network?

Latvia's 330 kV power network represents the middle point of the energy system of the Baltic states between its northern and southern parts. All 330 kV substations, except for "Daugavpils", have a dual power supply. The 110 kV network has a circle scheme. The majority of the 110 kV substations have two transformers and a dual power supply.

Where is NATO based in Latvia?

The NATO multinational battalion group in Latvia, under the leadership of Canada, is stationed in the locality of Kadaga. For its placement, new barracks and hangars were built at the expense of Latvian taxpayers, the entire infrastructure of the military camp and places for conducting combat training classes were updated.

What is a 'Latvian' Battalion?

The "Latvian" battalion includes a Canadian mechanized infantry battalion, a Czech grenade launcher unit, an Italian mechanized infantry group with combat vehicles, a Polish tank company, a Slovak mechanized infantry company, a Spanish mechanized infantry company with combat vehicles and tanks, and an infantry unit from Slovenia.

Are there fighter jets in Latvia?

There are also European fighter jets on duty as part of the NATO police mission in the Baltic States' airspace. There are also three Latvian military training grounds near the border with Russia and Belarus, which NATO forces use for exercises.

Where were the maneuvers carried out in the Ventspils region?

Moreover, in the Ventspils region the maneuvers were carried out in cooperation with the 46th Infantry Battalion of the 4th Kurzeme Brigade of the

Home Guard (people's volunteer corps) at the Medini 1 training ground in the Varva Volost.
