

SolarMax Energy Systems

Latvian energy storage power supply sales price

Overview

How much does electricity cost in Latvia in 2025?

In June 2025, the average electricity price in the Latvian bidding area decreased to EUR 43,06 per megawatt hour (EUR/MWh), which is 37% less than in May, while compared to June 2024, the price is 53% lower.

Why does Latvia import and export electricity?

Latvia's connection to neighboring countries enables it to import and export electricity, depending on demand and supply dynamics. The interconnectivity with neighboring countries not only ensures a stable electricity supply but also encourages competition and price regulation in the market.

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

What energy sources does Latvia use?

Alongside hydroelectric power, Latvia also utilizes other renewable sources like wind and solar energy, though to a lesser extent. The country's diverse energy mix is indicative of its commitment to reducing carbon emissions and promoting sustainable energy practices.

How much did price hours increase in Latvia compared to June 2024?

Compared to the previous month, the number rose by 174 % in Latvia, by 133 % in Lithuania, and by 196 % in Estonia. In comparison to June 2024, the number of negative price hours increased by 294 % in both Latvia and Lithuania, and by 325 % in Estonia.

Are new wind farms a good investment for Latvia's energy security?

I am pleased that the bar has been set high for developers of new wind farms, which also plays an important role in the context of Latvia's energy security," said Climate and Energy Minister of Latvia, Kaspars Melnis. Given the total investment in the project, the OP Corporate Bank provided loan financing.
