

SolarMax Energy Systems

Libya chemical energy storage power station connected to the grid

Overview

Where is the electricity grid in Libya?

The electric grid interconnection between Libya and Egypt – one of Libya's primary suppliers of electricity – begins at Wadi El Natrun and 6th of October in Egypt and continues along the North Coast to Marsa Matrouh, ending in Tobruk.

What is Libya's energy supply based on?

Furthermore, in 2020, the combined revenues from oil and natural gas exports constituted approximately 73% of Libya's total export value. In 2020, the total energy supply (TES) primarily came from oil and gas, which contributed 53% and 43%, respectively, while renewables accounted for approximately 4%.

How much power will Libya have in 2023?

In March 2023 GECOL announced that the country's total installed generation capacity had risen to a record 8200 MW, bypassing the prior high of 6000 MW. The power company forecasts that Libya's peak load will increase to 14,834 MW by 2025 and to 21,669 MW by 2030.

Is there a power shortage in Libya?

In August 2022 the General Electricity Company of Libya (GECOL) reported a shortage of 3200 MW in July, with production capacity ranging between 5100 and 5300 MW and demand at 8480 MW.

Does Libya have a power deficit?

While Libya is a leading oil and gas producer in Africa, it has faced a power production deficit for several years, though the gap was beginning to narrow in the second half of 2022.
