## Overview

---

How many solar farms are there in Lithuania?

The changes will enter into force on May 1, 2025. According to the ministry, there are currently more than 1,000 solar and wind farms larger than 100 kW in Lithuania and there are also several batteries of the same capacity, and some of their control systems are Chinese-made and remote-controlled.

Does Lithuania have a wind power plant?

Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania. With installed wind capacity of 178 MW in 2016, and an average power consumption of 1.1 GW, Lithuania was the EU Member State with the highest level of new wind capacity installed in 2016 relative to its power consumption.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Does Lithuania have a nuclear power plant?

Visaginas 's Ignalina Nuclear Power Plant once provided 70% of Lithuania's electricity and exported energy to elsewhere in the Soviet Union. After the dissolution of the Soviet Union, the European Union required the country to commit to nuclear decommissioning in Visaginas for Lithuania to join.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of

capacity and supplies about 3% of the electrical demand in Lithuania.
