

SolarMax Energy Systems

Long-term supply of three-phase sine wave inverters in South America

Overview

Which country has the largest string inverter market?

North America holds approximately 20% of the global string inverter market share, driven by increasing solar energy adoption in the U.S. and Canada. The U.S. alone contributes nearly 80% of North America's demand, with over 50% of newly installed residential solar systems using string inverters.

Why is the string inverter market undergoing transformative trends?

The string inverter market is experiencing multiple transformative trends. The demand for solar power is growing at a rate of 15% per year, increasing the need for efficient inverters. The price of string inverters has dropped by 10-12% annually due to mass production and technological advancements.

Which region will dominate the string inverter market?

According to recent developments, the Asia-Pacific region is expected to dominate the market for string inverters during the forecast period. Owing to the above points and the recent developments, the total investment of a new project with an annual output of 950,000 units of string inverters in this region is estimated to be USD 0.160 billion.

How is the string inverter market segmented?

The String Inverter Market is segmented by phase and power rating. By phase, the market is segmented into single phase and three phase. By power rating, the market is segmented into up to 10kW, 11kW to 40kW, 41kW to 80kW, and Above 80kW.

What are Sineng's string inverters?

Sineng's new generation series of three-phase string inverters are focused on the commercial and industrial segment of the South Africa Market. The capacities of these Sineng string inverters are 50kW, 120kW, 250kW, and 275kW, respectively.

What is the global string inverter market size?

String Inverter market size is estimated at USD 7639 Million in 2025 and is expected to reach USD 9527 Million by 2033 at CAGR of 2.8%.
