

SolarMax Energy Systems

Malaysia Solar Container Panel House BESS

Overview

What is Peninsular Malaysia's first utility-scale battery storage project?

The project marks Peninsular Malaysia's first utility-scale battery storage project. Back in February, Tenaga had talked about a battery pilot project that it said would be "operated by Grid System Operator (GSO), and overseen by the EC".

How many Bess projects are there in Malaysia?

The programme is broken into four projects with a capacity of 100mw/400mwh each and includes the design, installation and operation of BESS at various sites in Peninsular Malaysia. Each project must start operations by 2026 and is expected to have commercial operations spanning over a period of 15 years.

Can business solar save money in Malaysia?

In Malaysia, business solar users typically fall under two schemes: SelCo or NEM NOVA. Both schemes help you save on its own — but when you add BESS into the picture, you unlock even more control and value. SelCo users cannot export energy to the grid, so BESS ensures you don't waste unused energy.

What is Bess & how does it work in Malaysia?

In alignment with Malaysia's visionary target of sourcing 70% of its energy from renewables by 2050, BESS emerges as a cornerstone technology. It provides a dynamic buffer that seamlessly adjusts to the variable nature of green energy sources, thus ensuring a steady and reliable flow of clean power.

What are the benefits of Bess in Malaysia?

The transformative power of BESS in Malaysia extends beyond environmental benefits. It catalyses advancements in smart grid technology and energy management systems, promoting efficient energy usage and emissions

reduction.

Why is Malaysia launching a Bess auction?

Peninsular Malaysia's rising solar penetration, currently over 2.5 GW, has increased the urgency to deploy storage as a flexible grid asset. By launching this BESS auction ahead of major stability issues, Malaysia is taking a proactive step to future-proof its power system, with COD targeted for 2026.
