# Mozambique Energy Storage and New Energy

## Overview

---

What is Mozambique's energy transition strategy?

Mozambique recently unveiled a game-changing energy transition strategy that is paving the way for heightened investment inflows and universal access to energy across the country.

Can Mozambique generate electricity from renewable resources?

The total potential for generating electricity from renewable resources is over 23,000GW, most of which comes from solar energy. The total electrification rate was about 40% in 2021. Mozambique's installed capacity stands at 2,905MW and is determined by the Cahora Bassa hydroelectric plant, which has an installed capacity of 2,075MW.

How much energy will Mozambique generate a year?

The plant will increase Mozambique's installed capacity by 50% and generate 8.6 TWh per year, enough to power more than 3 million homes. A GREEN REVOLUTION: The country is also actively developing other renewable energy segments, such as solar and wind, which together are expected to represent 20% of domestic energy production by 2040.

Could Mozambique become an electricity hub in southern Africa?

1. Introduction Mozambique possesses a wide range of renewable energy resources, which could not only allow the country to meet its own domestic electricity needs, but may also allow Mozambique to turn into an electricity hub within the Southern Africa region.

Is a floating solar power project possible in Mozambique?

Mozambique public utility Electricidade de Moçambique intends to carry out a feasibility study into the potential development of a floating solar power project on the Chicamba dam (Manica province) as well as feasibility studies for battery energy storage systems BESS in ten sites in Mozambique.

## Does Mozambique have an Energy Regulatory Authority?

In recent years Mozambique have made efforts to improve the legal and regulatory framework for the electricity sector to create an enabling environment to attract private investment in renewable energy and off-grid projects. As a result, an Energy Regulatory Authority (" ARENE ") was created in 2017.
