Necessary conditions for installing solar photovoltaic panels in Suriname

Overview

How to start a solar power plant in Suriname?

The Electricity Act 2016 in Suriname states that utility scale solar plants shall be introduced by organizing a tender process and by signing Power Purchase Agreement between the energy company and the owner of the solar or wind power plants.

Will solar energy be cheaper in Suriname?

The price of solar energy has been dropping dramatically during last 20 years and the projections suggest that it will maintain that trend in the coming years. In a near future, solar energy in Suriname will be cheaper than the electricity coming conventional fossil fuel plants.

Why is solar energy important in Suriname?

Additionally, in Suriname there is a good complementarity of the hydro and solar resources. During dry season, when the level of the dam is low, the solar radiation is higher. In this period, solar energy can help reduce the risk of energy deficit.

Where can solar energy be implemented?

Other feasible areas for implementing solar energy are the 135 villages located in the interior of Suriname (Hinterland) where solar solutions can provide 24 hours of clean, reliable and affordable energy. Most of them are receiving 4 to 6 hours electricity by using diesel generators, which is an expensive and polluting solution.

Can solar panels be used for self-consumption?

The Electricity Act 2016 also establishes the possibility for private consumers to install their own solar panels for self-consumption and to use the electric grid to exchange the energy by using net metering scheme. The user can recover the energy excesses sent to the grid with no additional cost.

Which solar plant in Atjoni & Pokigron will be a showcase?

The recently inaugurated solar plant in Atjoni and Pokigron can be the showcase for the development of this kind of solution. REN 21 (Subastas de energía renovable y proyectos ciudadanos participativos) Jordi Abadal is from Barcelona, Spain. He is an industrial engineer with a specialty in environmental sciences.
