

SolarMax Energy Systems

Nepal Power Plant Off-Grid Energy Storage Power Generation Project

Overview

As of 4 March 2025, Nepal's total installed electricity capacity is 3421.956 megawatts (MW). This includes 3255.806 MW from hydropower, 106.74 MW from solar, 53.41 MW from thermal, and 6 MW from Co-generation. The following is a list of the power stations in Nepal.

- Solar power stations • 10 other small hydropower stations (total: 2.460) • 29 small isolated hydropower stations (total: 5.676 MW) .

• • • • •

Gham Power, in collaboration with Practical Action and Swanbarton, has been awarded a project by the United Nations Industrial Development Organisation (UNIDO) to install one of Nepal's largest energy storage systems, with a total battery capacity of 4MWh.

Nepal Power Plant Off-Grid Energy Storage Power Generation Project

100% renewable energy with pumped-hydro-energy storage in Nepal

Nepal has vast low-cost off-river pumped hydro-energy-storage potential, thus eliminating the need for on-river hydro storage and moderating the need for large-scale batteries.
