

## SolarMax Energy Systems

# Netherlands Energy Storage Power Generation Project

## Overview

---

Will RWE build a battery energy storage system in the Netherlands?

Utility and IPP RWE will build a 7.5MW/11MWh battery energy storage system (BESS) in the Netherlands with grid-forming inertia capabilities.

How much energy storage does the Netherlands need?

To achieve its renewable energy targets, reports in 2021 indicate that the Netherlands will need to install between 29 and 54 gigawatts (GW) of energy storage capacity by 2050. Storage with efficient management systems and digital controls is a crucial element of a reliable, flexible and affordable energy system.

What is Wärtsilä's energy storage project?

This is Wärtsilä's first project in the Netherlands and one of the first of its kind anywhere in central Europe. As the largest energy storage project in the Netherlands to date, it will store the equivalent of the annual energy consumption of more than 9,000 households each year and reduce annual carbon dioxide emissions by up to 23,000 tonnes.

Is there a roadmap for energy storage in the Netherlands?

In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market.

How big is RWE's battery energy storage system?

The company currently operates battery storage systems with a total capacity of around 1,200 megawatts (MW). RWE's first inertia-ready battery energy storage system (BESS) has started commercial operation on the site of the company's power plant in Moerdijk, the Netherlands.

What do market participants want from energy storage solutions?

Market participants also indicated that they wanted national targets set for energy storage solutions, and more efficient permitting procedures to support them in the development of storage assets. The government responded to some of the feedback from market participants, issuing its first Energy Storage Roadmap in June 2023.
