

## SolarMax Energy Systems

# Netherlands PV energy storage requirements

## Overview

---

No specific laws & regulations: In the Netherlands, energy storage is not described in Dutch laws and regulations as a specific item. What are the laws & regulations on energy storage in the Netherlands?

No specific laws & regulations: In the Netherlands, energy storage is not described in Dutch laws and regulations as a specific item. Standard requirements: It has to meet standard requirements for production and consumption and some specific technologies that are part of the energy storage system must comply with standardisation.

Should building-integrated PV be mandated in the Netherlands?

While there is an energy label in place for buildings in general and measures exist to reduce the dependency on natural gas in the build environment, there are no policies in place to incentivize or mandate building-integrated PV in the Netherlands.

How a 10 MW photovoltaic system can be built in the Netherlands?

Netherlands: Ampyr and Rockwool conclude solar PPA In order to build a 10 MW photovoltaic system, CCE The Netherlands invested around mid-three-digit amount euros in preparing the soil on 6.2 hectares and sealing the area. A special geotextile layer is used to seal the area for at least three decades and enables it to be used for other purposes.

Is BAPV solar PV mandatory in the Netherlands?

There are no mandatory measures for BAPV solar PV in the Netherlands other than the BENG norm for newly build houses which have to almost energy neutral. This implies often the installation of a certain amount of solar PV depending on the energy profile of the finished house and installations.

Is CCE focusing on co-located PV projects in the Netherlands?

CCE is also increasingly focusing on co-located projects (PV plus storage) in

the Netherlands. The Dutch government is looking at new subsidy structures for co-located BESS PV projects. Since the details have not yet been published, it is only a business case with reservations at this time.

What are the future prospects for solar PV in the Netherlands?

Cederik Engel, Managing Director of CCE The Netherlands and Head of ESG at CCE Holding, sees strong prospects ahead. The Netherlands leads the EU in per-capita solar PV capacity, having added around three gigawatts annually over the past three years.

## Netherlands PV energy storage requirements

### Photovoltaic energy storage in the netherlands

The Netherlands could reach between 100 GW and 180 GW of total installed solar capacity by 2050, according to a new report by Netbeheer Nederland, the Dutch association of national ...
