

## SolarMax Energy Systems

# Netherlands energy storage battery exports

## Overview

---

Is the Netherlands a good market for battery storage?

The Netherlands is an emerging market for battery storage but, due to the lack of saturation, also a highly exploitable one. In early 2025, Enspired, together with Flexcity and S4 Energy, reached an exciting milestone by taking the country's first 4-hour BESS live in a cross-market optimization setup.

What is the Netherlands rechargeable battery market?

The Netherlands Rechargeable Battery Market report segments the industry into Battery Type (Lithium-ion Battery, Lead-Acid Battery, Other Technologies (NiMh, NiCd, etc.)), Application (Automotive Batteries, Industrial Batteries (Motive, Stationary (Telecom, UPS, Energy Storage Systems (ESS), etc.)), Portable Batteries (Consumer Electronics, etc.)).

Are batteries a barrier to energy storage in the Netherlands?

Under the Electricity Act 1998, generation is exempt from the payment of transmission costs, but consumption is not. This highlights one of the main barriers to energy storage in the Netherlands, as batteries currently pay more transmission costs than polluting wholesale consumers.

Do Dutch home battery purchases keep driving battery storage installations?

Dutch home battery purchases keep driving battery storage installations. According to Dutch New Energy Research's Nationaal Smart Storage Trendrapport 24/25, 410 MWh of new battery capacity was installed in the Netherlands in 2023 - 1 MWh is enough to power a couple hundred homes for a day.

Should electricity storage be regulated in the Netherlands?

However, the Dutch regulatory authority, the Netherlands Authority for Consumers and Markets (ACM), can grant exemptions where electricity storage is necessary for grid operators to perform their statutory duties but

where market participants are not sufficiently investing in storage capacity.

Who are the key players in the Netherlands rechargeable battery market?

The Netherlands rechargeable battery market is semi-fragmented. Some of the key players (not in particular order) are BYD Company Ltd, Duracell Inc., Exide Industries Ltd, EnerSys, and Panasonic Holdings Corporation, among others.
