

## SolarMax Energy Systems

# New Energy Storage Specialty Industrial Base

Solar Panel

PV Combiner Box

Lithium Battery

Hybrid Inverter

## Overview

---

How can pre-production storage system design improve manufacturing scale-up?

Identifying and implementing design innovations will align pre-production storage system design to set the stage for manufacturing scale up and improved production of cost-effective, safe, and reliable short-, medium-, and long-duration storage technologies. New Report Showcases Innovation to Advance Long Duration Energy Storage (LDES):.

Why do we need energy storage solutions?

As the global energy transition accelerates, the need for reliable, scalable and cost-effective energy storage solutions has never been greater.

What are the different types of stationary energy storage technologies?

Stationary energy storage technologies broadly fall into three categories: electro-chemical storage, namely batteries, fuel cells and hydrogen storage; electro-mechanical storage, such as compressed air storage, flywheel storage and gravitational storage; and thermal storage, including sensible, latent and thermochemical storage.

What does OE's new RD&D report mean for energy storage?

New Report Showcases Innovation to Advance Long Duration Energy Storage (LDES): OE today released its new report “Achieving the Promise of Low Cost LDES.” This report is one example of OE’s pioneering RD&D work to advance the next generation of energy storage technologies.

Where will UK energy storage develop a hydrogen storage solution?

UK Energy Storage plans to develop this hydrogen storage solution in three areas of the UK – Dorset, East Yorkshire and Cheshire – with the goal of delivering its first project by 2030. Swiss company Energy Vault is an active developer of gravitational energy storage solutions, particularly in China.

How can energy storage technology improve resiliency?

This FOA supports large-scale demonstration and deployment of storage technologies that will provide resiliency to critical facilities and infrastructure. Projects will show the ability of energy storage technologies to provide dependable supply of energy as back up generation during a grid outage or other emergency event.
