Outdoor Power Project

Overview

Underground wiring puts light and power anywhere in the yard. We'll show you how you can do it easily and safely. Run an underground electrical line into the garden to power an outdoor light. Here's the quickest and cheapest method for bringing power to a remote spot without tearing up your yard.

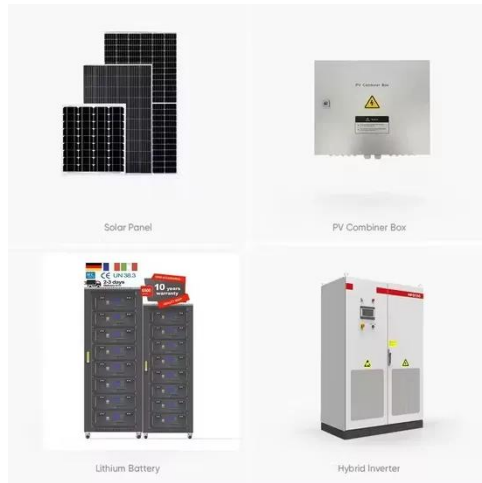

Determine where you want the electrical post positioned and then find the nearest existing outlet to supply the power. Note: That outlet must be.

Mark the cable route from the power source (house outlet) to the position of the remote outlet with spray paint. Call the utility companies to mark any underground lines. Get an.

Drive 1/2-inch rigid metal conduit under the walkway with a sledgehammer. Pro tip: Never use "thin wall" conduit, which corrodes quickly, or.

To make sure the "feeder" outlet you choose is GFCI protected, look for the characteristic GFCI buttons, or if it's a standard outlet.
