Outdoor power box protection level

Overview

Outdoor junction boxes must have a high enough ingress protection rating—commonly referred to as IP rating—to resist rain, dust, and other external factors. For most outdoor scenarios, an IP66 rating is ideal.

Outdoor power box protection level

What is the minimum protection level for outdoor distribution boxes

According to JGJ 242-2011 Residential Building Electrical Design Code 6.2.5, it is stipulated that the protection level of outdoor power supply inlet box is not lower than IP54.
