

SolarMax Energy Systems

Outdoor power supply continuous operation

Overview

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

What is an outdoor DC UPS backup power?

An Outdoor DC UPS Backup Power is the perfect solution for continuous power, day or night for surveillance cameras and wireless equipment. Get up to 10 days of backup power. [Click to Download UPS Spec Sheet.](#)

What is an outdoor UPS system?

Outdoor UPS system for areas with dust, debris, and temperature swings. Keeps power consistently stable in all critical industrial operations.

How does a UPS system work if AC power goes out?

This input voltage passes through an advanced charge controller to the UPS system's battery bank. Even when AC power goes out, your equipment stays online. In the security industry, the only acceptable down-time is none.

What is a outdoor industrial UPS?

Outdoor Industrial UPS for Harsh Environments is a growing category of UPS systems that are built to withstand the stresses of an industrial environment. With floor space in data centers and other climate-controlled areas at a premium, more UPS systems are operating in harsh environments that can include vibration, dust, and liquid splatter.
