

## SolarMax Energy Systems

# Outdoor power supply requirements in North Macedonia

## Overview

---

How much energy does North Macedonia need to make 1 EUR?

In fact, North Macedonia needs to spend 0.24 toe (2.8 MWh) of energy to make 1 EUR, unlike EU28 where only 0.1 toe (1.2MWh) is needed. Proposed measures, especially in the area of energy efficiency, will increase the productivity without increasing energy consumption, bringing North Macedonia closer to the EU 28 average. Figure 11.

What changes did North Macedonia make to its energy policy?

While there were no other major energy legislative changes, North Macedonia continues to harmonize its energy sub-regulations with the EU Energy Community's Third Energy Package (TEP).

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, solar power plants, a few biogas plants, and two wind power farms.

Who regulates the energy sector in North Macedonia?

Energy Regulatory Commission (ERC): The Energy Regulatory Commission regulates and oversees the energy sector in North Macedonia. ERC is responsible for ensuring fair competition, consumer protection, and adherence to legal and regulatory standards. 3.

How does North Macedonia generate electricity?

North Macedonia has historically relied on hydropower for a significant portion of its electricity generation. The country has utilized its rivers to develop hydropower plants. There have been also efforts to harness wind energy, and several wind projects have been proposed or are under development.

## How to increase energy storage and system flexibility in Macedonia?

Furthermore, in order to increase the energy storage and system flexibility, among top priorities is the construction of pumped-storage hydro power plant Chebren. The objective is up to 2028 this power plant to be commissioned. The natural gas market in Macedonia is liberalized starting from 2015.
