Overview

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

Is an external power supply required?

An external power supply is required for devices like printers, displays, pin pads, external DVD-ROMs, and hard drives. Unfortunately, the bus supplied power is limited to 2.5 Watts (0.5A @ +5V) per port, sufficient to provide enough power to input devices, web cameras, and other low power devices.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Are outdoor power strips weather resistant?

Outdoor power strips come in a variety of sizes, from small three-outlet models up to large 10-outlet beasts. Unlike indoor models, these rugged, weather-resistant power strips can endure extreme temperatures and even downpours. Understanding what weather conditions an outdoor power strip is rated to handle is key to purchasing the right one.

Are outdoor power strips Wi-Fi Ready?

Some outdoor power strips are Wi-Fi ready, allowing them to connect to your home network. These smart power strips can be controlled via a smartphone app, which is ideal for turning on and off holiday lighting displays.
