

SolarMax Energy Systems

Pakistan Solar Energy Application System

Overview

Solar power in Pakistan is growing at the "most extreme" rate in the world, with solar installations providing an estimated one-third of the country's entire generating capacity added in 2024 alone. Solar power is now the largest electricity source in Pakistan, accounting for more than 25% of total production in 2025. As electricity prices doubled from 2021 to 2024, and Chinese solar panel manufacturers with manufacturing overcapacity cut prices, Pakistanis have taken to installing so.

This complete guide on solar systems in Pakistan for 2025 covers everything you need to know — from prices and types to installation steps, net metering, and trusted companies.

Pakistan Solar Energy Application System

How to Apply for a Solar Panel Scheme in Pakistan

In this guide, we will walk you through how to apply for a solar panel scheme in Pakistan, covering each province's programs and why the residents of the country's top five most populous cities ...

12.8V6Ah
Nominal voltage (V):12.8
Nominal capacity (ah):6
Rated energy (Wh):76.8
Maximum charging voltage (V):14.6
Maximum charging current (A):14.6
Floating charge voltage (V):13.6~13.8
Maximum continuous discharge current (A):10
Maximum peak discharge current @10 seconds (A):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):-4~50
Discharge temperature (°C):-20~60
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5C, 100% doD): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):90*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds
