

## SolarMax Energy Systems

# Pakistan s solar power supply system

## Overview

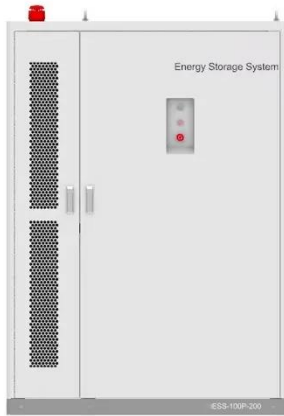

---

Pakistan's solar energy boom, which accelerated in 2023 due to falling global solar panel prices and increased imports from China, led to widespread adoption of solar systems among wealthier individuals and farmers, often supported by government subsidies. Many of these users disconnected from the national electricity grid, concentrating the financial burden of maintaining fossil fuel-based power plants and aging infrastructure on a shrinking pool of grid-connected co.

Pakistan's solar sector is booming, yet the total installed capacity remains far below the global average. Specifically, solar energy in Pakistan accounts for just 0.9% of the country's total electricity supply, which is dominated by gas, hydropower and coal.
