

**SolarMax Energy Systems**

# **Palau Wind-Solar Energy Storage Power Station**

## Overview

---

### What is Palau solar & battery storage?

The Palau solar and battery storage project not only bolsters the country's energy independence but also highlights the potential for renewable energy to power nations across the Pacific. As Palau paves the way, it inspires others to follow suit, driving the transition towards a greener and more sustainable world.

### Does Palau have solar power?

Source: PPUC and PEA data (n.d.). Together with a large amount of diesel generation, Palau also has some installed solar PV capacity. Indeed, the country's current renewable energy capacity includes a total of 2.5 MW of utility-scale solar PV systems (see Table 3).

### What is Palau's energy storage system?

energy storage system, was undertaken by Solar Pacific Pristine Power, a privately owned company. The plant will provide approximately 20 per cent of Palau's power needs, delivering up to 23,000 megawatt hours per year to the grid network, reducing Palau's reliance on expensive diesel generators.

### How much solar PV is needed in Palau?

The results show that on top of the 2.5 MW of solar PV currently present in Palau, an additional 83 MW of solar PV and 20 MW of wind turbines would be required for such a system. Furthermore, this scenario would necessitate a battery storage system of 168 MWh and battery inverters of 34 MW.

### Where is Palau's first solar power plant located?

We're proud to have supported the establishment of Palau's first utility-scale solar power plant at Ngatpang on Babeldaob. energy storage system, was undertaken by Solar Pacific Pristine Power, a privately owned company.

## What is the optimal power system for Palau?

The optimal system includes the current power system together with additional renewable capacity coupled with battery storage. The results of the optimisation show that Palau's current power system is dominated by diesel generation, with renewable energy only taking a small share (just 4%).

Home Energy Storage  
(Stackble system)

High Efficiency    Easy installation    Safe and Reliable    Perfect Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem
- LiFP battery, safest and long cycle life
- Stackble design,effortless installation
- Capable of High-Powered
- Emergency- Backup and Off-Grid Function
