

## SolarMax Energy Systems

# Philippines Mining Energy Storage Project

## Overview

---

What is a floating solar project in the Philippines?

In a news release, Carmen Copper noted that the project, which can scale up to 50 megawatts, is part of its strategy to reduce its dependence on fossil fuels and aligns with the Philippine Department of Energy's target of sourcing 35% of power from renewable energy by 2030. Why floating solar?

.

What is the impact of a solar power project in the Philippines?

The project has strong sustainability credentials, notably because of its impact in decarbonising the Philippines' energy system (SDG7), but also by generating power to support economic development (SDG8), creating more than 10,000 new jobs (SDG8), and facilitating local development (SDGs3+4).

What is the Philippines' first megawatt-scale floating solar facility?

The Philippines' first megawatt-scale floating solar facility in Cebu as seen in a August 2025 handout image. MANILA, Philippines — A floating solar power plant on a reservoir in Cebu has begun supplying energy to a copper mine, marking the country's first megawatt-scale deployment of the emerging technology.
