

## SolarMax Energy Systems

# Photovoltaic energy storage cabinet solar separated wall-mounted

## Overview

---

What is a commercial solar battery storage system?

The commercial solar battery storage system is loaded with cell modules, PCS, photovoltaic controller (MPPT) (optional), EMS management system, fire protection system, temperature control system and monitoring system. The system configuration is modular, support multi-machine parallel, plug and play, easy to install and maintenance.

What is integrated solar+ESS design?

Integrated Solar+ESS design, suitable for access of PV. New energy vehicles use PV clean electricity as priority. Off-grid operation can ensure that chargers will work even when there is power outage. On-grid/off-grid switching in milliseconds to realize noninductive shifting between utility grid and PV on wind energy storage systems.

What is a rack-mounted modular PCS?

Configured with a rack-mounted modular PCS, it supports parallel connection of multiple machines and has good scalability; the number of PCS modules and the total battery power can be selected according to the solar energy thermal storage system capacity requirements of microgrid and other scenarios.
