Photovoltaic panel price

Overview

How much do solar panels cost on average?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). Are solar panels expensive?

No, solar panels in the USA are not considered expensive. On average, a 6.6 kW solar panel system typically costs around \$16,000, not considering government incentives and rebates. Solar panel costs in the US usually range from \$4,500 to \$36,000, or \$1.00-\$3.60 per watt (W).

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are \$0.80 to \$1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost \$4,800 to \$6,600. A single solar cell costs about \$0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.

How much do polycrystalline solar panels cost?

Polycrystalline solar panels, while slightly less efficient than monocrystalline panels, are significantly cheaper at \$0.75 to \$1.50 per watt (W) because they are relatively easy to manufacture.

How much does a campervan solar panel cost?

For a Campervan solar panel setup, a basic solar panel system typically costs around \$1,500. A basic setup like this is suitable for powering small electronics like lights, laptops, and TVs. Moving up to a more comprehensive setup for boondocking purposes, costs range from \$4,000 to \$8,000.

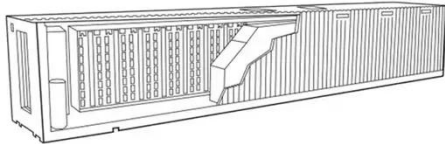

How much does a monocrystalline solar panel cost?

In the United States, the cost of premium monocrystalline and PERC panels reaches as high as \$3.68 per watt, including installation costs. This peak pricing is observed in locations such as Rhode Island and Illinois. However, in the United States, on average, monocrystalline panels are priced between \$1.00 and \$1.50 per watt.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.
