

SolarMax Energy Systems

Photovoltaic power generation and energy storage in Latvia

Overview

Latvia's Energy Strategy 2050 outlines major changes in renewable energy production and storage, with significant investments planned in wind, solar, biomass, and biogas, as well as in energy storage technologies like batteries and subsurface systems to ensure supply stability [3].

Photovoltaic power generation and energy storage in Latvia

European Energy starts construction of Latvia's biggest solar farm

European Energy's executive vice president and head of project development, Thorvald Spanggaard, highlighted the country's renewable energy targets: "According to the ...
