# Photovoltaic power supply and photovoltaic inverter project

## Overview

---

Suppose we have the following electrical load in watts where we need a 12V, 120W solar panel system design and installation. 1. An LED lamp of 40W for 12 Hours per day. 2. A refrigerator of 80W for 8 Hours per day. 3. A DC Fan of 60W for 6 Hours per day. Now let's find the number of solar panels, rating and sizing.

Site assessment, surveying & solar energy resource assessment: Since the output generated by the PV system varies significantly depending on the time and geographical location.
