

## SolarMax Energy Systems

# Power Storage in the Democratic Republic of Congo

## Overview

---

What is the main priority for the Democratic Republic of Congo's power sector?

The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The Democratic Republic of Congo is a large country with 10 million households of which 1.6 million have access to electricity. This makes it the third largest population in the world without access to electricity.

What are the renewable sources of power in DRC?

The DRC's potential renewable sources are hydropower, biomass, solar, wind and geothermal, while the non-renewables would be oil, natural gas & uranium . Approximately 9% of the country's generated domestic power comes from hydropower, specially the two Inga dams (Inga I & Inga II) .

Is there a hotspot for wind power in the DRC?

Wind: There exist several potential hotspot for moderate wind power harnessing, where the wind speed averaging 6-6.6m/s. On the eastern parts of the DRC, there are many active volcanoes and geothermal sites, which significantly gives the country huge potential for this particular sort of energy.
