

SolarMax Energy Systems

Power grid Taipei energy storage

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO₄

Overview

How can energy storage equipment improve the power grid?

Energy storage equipment at the grid side: Strengthen the resilience and flexibility of the grid. Combined with renewable energy to supply peak time at night and stabilize the power grid. Provide power grid functions such as frequency adjustment, quick response, and peak cut. Reach 3,000MW capacity goal by 2030 and proceed the rolling review.

Why are stable energy storage solutions important in Taiwan?

As Taiwan's renewable energy share continues to grow, stable energy storage solutions are becoming increasingly vital to offset fluctuations in solar and wind power generation.

Does Taiwan have a grid resilience plan?

Taiwan is engaged in a multifront effort to add resilience to its electrical grid. The centerpiece of this campaign is the Grid Resilience Strengthening Construction Plan (電網韌性強化計畫), announced by Taiwan Power Company (Taipower, 台電) in September 2022.

What is E-dreg energy storage facility?

Billion Watts Launches 64MW E-dReg Energy Storage Facility, Strengthening Taiwan's Grid Stability Strategically located within an industrial zone, the facility plays a crucial role in energy shifting and frequency regulation, participating in Taiwan Power Company's E-dReg ancillary services market.

What factors affect Taiwan's Power Grid?

Taiwan's grid also faces risk from a triad of exogenous factors that deserve mention: seismology, weather, and regional geopolitics. Taiwan's biggest electricity failure prior to the 2017 outage resulted from an earthquake in 1999. Typhoons also pose a risk, particularly when high winds damage power lines.

How will Taipower resilience strengthen the grid?

To avoid such chain reactions in the future, Taipower has instituted the Grid Resilience Strengthening Construction Plan for “promoting distributed grid projects,” “improving grid reinforcement projects,” and “strengthening grid protection capabilities.” The total investment of NTD \$564.5 billion will come in installments over 10 years.
