

## SolarMax Energy Systems

# Power sales price of Portugal s energy storage power station

## Overview

---

Enerland bid €11.14/MWh (US\$13.12), or US\$0.0131/kWh, for a 10MW lot in last week's auction, below the most recent industry record tariff of US\$0.0135/kWh set by the Al Dhafra project in Abu Dhabi in April. Of the total 700MW available, Q CELLS was awarded 315MW, winning six of 12 lots available. Does Portugal need energy storage?

Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production. To this end, the country's Ministry of Energy announced on Wednesday that it has allocated €99.75 million in a bid to support 500 MW of energy storage projects.

Why are Portugal's electricity prices so low?

Portugal's renewable power capacity has been growing rapidly over the last years, pushing spot power prices to a decade low earlier this year. According to network operator REN, renewable energy generation covered 95% of the nation's electricity demand in April. That follows a 91% share in March, 88% in February, and 81% in January.

Why is Portugal launching a solar energy storage project?

This initiative aims to enhance the flexibility and stability of Portugal's power supply system amid its record-breaking solar electricity production. On July 31, the ministry announced the allocation of €99.75 million through a call for tenders to install energy storage projects totaling 500 MW.

How much will Portugal spend on energy storage and grid flexibility?

The Portuguese Ministry of Energy has allocated EUR 100 million (\$108 million) for grid flexibility and energy storage projects which should be installed by the end of 2025. Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production.

What does Portugal's energy policy mean for the energy sector?

The Portuguese Ministry of Energy has allocated €100 million for grid flexibility and energy storage projects to be completed by the end of 2025. This initiative aims to enhance the flexibility and stability of Portugal's power supply system amid its record-breaking solar electricity production.

What percentage of Portugal's energy is renewable?

The share of renewables in Portugal's energy mix has grown from 27% in 2005 to 54% in 2017, with the last coal-fired power plant closing in 2021. As part of its new energy strategy, Portugal aims to produce 80% renewable electricity by 2026 and 85% by 2030.
