

# **Preliminary design of building solar energy system**

## Overview

---

The RERH specifications and checklists take a builder and a project design team through the steps of assessing a home's solar resource potential and defining the minimum structural and system components needed to support a solar energy system.

## Preliminary design of building solar energy system

---

### Design and Sizing of Solar Photovoltaic Systems

The design of a PV system should consider whether the building should be able to operate wholly independent of the electrical grid, which requires batteries or other on-site energy storage

...

## **Preliminary Design of a Solar Photovoltaic Array for Net-Zero**

**Outdoor Cabinet BESS**  
50 kWh/500 kWh Battery Storage System  
Industrial and Commercial Energy Storage

**All In One** Integrating battery packs  
**High-capacity** 50-500kWh  
**Degree of Protection** IP54  
**Operating Temperature Range** -20-60°C(Derating above 50 °C)

**Intelligent Integration** integrated photovoltaic storage cabinet  
**Rated AC Power** 50-100kW  
**Altitude** 3000m(>3000m derating)

...

This investigation was initiated to determine the preliminary design requirements for a Net-Zero Energy Building which is defined as a building that produces as much energy as it uses over ...
