Price of outdoor wind power base stations in Latvia

Overview

How many wind farms are there in Latvia?

There are 19 operational wind farms in Latvia with capacity above 0.25 MW and 18 wind farms with capacity below 0.25 MW. There are currently a total of 23 operational biogas power stations and seven biomass power stations in Latvia. Most of them are cogeneration stations.

How many power stations are there in Latvia?

This article lists all power stations in Latvia. Additional to the three major hydroelectric plants, there are approximately 150-160 operational hydroelectric plants with capacity below 5 MW each. There are 19 operational wind farms in Latvia with capacity above 0.25 MW and 18 wind farms with capacity below 0.25 MW.

Where to build an offshore wind farm in Latvia?

According to the feasibility study results, the most suitable location for building an offshore wind farm in Latvia is on the coast of Kurzeme between Liepaja and Ventspils, where the most appropriate conditions for the development of the project exist.
