Prices of bifacial solar panels in the UK

Overview

For the average home in the UK, bifacial panels in the UK tend to cost between £9,900 - £11,000, including installation. Generally, because of their advanced design and specialised equipment, bifacial panels prices are around 10% higher than the cost of solar panels with a monofacial design. How much do bifacial panels cost in the UK?

For the average home in the UK, bifacial panels in the UK tend to cost between £9,900 - £11,000, including installation. Generally, because of their advanced design and specialised equipment, bifacial panels prices are around 10% higher than the cost of solar panels with a monofacial design.

How much does a bifacial solar system cost?

Bifacial panels have transparent front and back sides that can both capture solar energy for your home. The average 4kW bifacial system will cost £5,500 - £6,600, and could save you £860 per year on your electricity bills. Bifacial panels are highly efficient at capturing solar energy, potentially increasing your solar panels' output by up to 30%.

Do bifacial solar panels cost more?

Bifacial solar panels often cost slightly more than monofacial panels, but just barely. This is usually the case with the latest solar systems – you'll also pay a higher price for half cell panels, monocrystalline models, or panels with a higher efficiency than average.

Are bifacial solar panels available in the UK?

Currently, a handful of manufacturers offer bifacial solar panels in the UK. Below are the available models, all of which are monocrystalline. As time goes by, we're sure to see more manufacturers release their own bifacial solar panels.

What are bifacial solar panels?

One of the main advantages of a bifacial panel is its increased efficiency. Bifacial solar panels work to capture sunlight from both sides of the panels, increasing total energy generation numbers compared to their monofacial counterparts. As a result, bifacial solar modules are more cost-effective when it comes to efficiency levels.

Who makes bifacial solar panels?

Currently, only a select few solar panel manufacturers offer bifacial models, including industry leaders like REA, LG, Canadian Solar, Longi, Trina Solar, and Yingli Solar. However, the solar industry is dynamic and continuously evolving.
