

## SolarMax Energy Systems

# Proposed energy storage projects in Kosovo

## Overview

---

What is the energy strategy for Kosovo?

The Kosovo energy strategy includes increasing RES capacity to 35% of electricity consumption by 2031. Aiming for 600 MW wind, 600 MW solar PV, 20 MW biomass & at least 100 MW of prosumer capacity, to reach a total installed RES capacity of 1600 MW by 2031. Lignite exploitation in Kosovo started in 1922.

Which companies are affecting the energy sector in Kosovo?

Besides government institutions, there are also companies with great impact in energy sector such as Kosovo Energy Corporation (KEK), Transmission, System and Market Operator (KOSTT) and Kosovo Electricity Distribution and Supply (KEDS). A lot of legislative documents that aim the adjustment of electricity sector have been approved.

What is the New Kosovo power plant?

The New Kosovo power plant is part of the government's plans to reform Kosovo's energy sector. Other plans include closing Kosovo A power station by 2017, rehabilitating Kosovo B power station to meet EU standards, and privatizing the country's electricity distribution system. Plans for New Kosovo also include a lignite coal mine, the Sibovc SW.

How inherited issues have affected the energy sector in Kosovo?

The inherited issues after the war in Kosovo and the transition period have had an immense effect on the progress of this sector. Regulation of activities in energy sector in Kosovo is a responsibility of the Energy Regulatory Office (ERO).

What is the energy storage project?

The Energy Storage Project aims to support Kosovo's energy security and transition to a cleaner energy future.

What percentage of energy is produced in Kosovo?

Around 90% percent of energy production in Kosovo is from lignite, a soft coal that produces toxic pollution when burnt. Official figures show Kosovo has the world's fifth largest lignite reserves of 12-14 billion tonnes. Our Standards: The Thomson Reuters Trust Principles.

## Proposed energy storage projects in Kosovo

---

### MCA Kosovo

The objective of the Battery Energy Storage System (BESS) project is to support Kosovo's energy security through usage of energy storage systems for reserves, availability of the storage ...

-  **Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 150% Peak Output Power
  - 2 MPPT Trackers, 150% DC Input Overvoltage
  - Max. PV Input Current 15A, Compatible with High Power Modules
-  **Intelligent Simple O&M**
  - IP66 Protection Degree: support outdoor installation
  - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC & AC Type II SPD: prevent lightning damage
  - Battery Reverse Connection Protection
-  **Flexible Abundant Configuration**
  - Plug & Play, EPS Switching Under 10ms
  - Compatible with Lead acid and Lithium Batteries
  - Max. 6 units Inverters Parallel
  - AFCD Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Prequalification open for 170 MW of battery storage in Kosovo\*

The project contributes to poverty reduction through economic growth. Within the mechanism, a new prequalification call is on until February 14 for the design and build of utility ...
