Pulling photovoltaic module containers

Overview

How do I know if my PV modules have been shipped?

Before you unpack your modules, check the shipping label to ensure you received the right modules. Once you unpack your modules, check the module frame serial number and model label against the shipping label. The serial number is the unique identifier of each PV module.

How are the modules transported?

The modules shall be transported on a flat ground; When taking the modules out of the box, it is recommended to use protective tooling to separate the modules to prevent friction from producing flecks.

Why is my PV module not working?

Improper handling or bad placement can cause microcracks in PV modules which immediately lower their power. Crystalline modules are especially fragile, while thin-film panels are usually more sturdy. In fact, some manufacturers claim that you can even step on certain thin-film panels, though we wouldn't recommend doing it anyways.

How to store the modules?

The modules shall be stored in a complete outer package. The storage area shall be protected pallets and boxes from damp, direct sunlight and waterproof (rain) measures; The modules should be placed neatly with a safe distance between the boxes. The spacing between boxes should be greater than 30cm(Figure 10);.

Where should a module package be located in a forklift?

One side of the module package should be close to the retainer (Figure1); When using a forklift to move palletized packing boxes to the operation area, the forklift shall be slowly and steadily lifted and put down gently during loading and unloading, and the modules shall avoid turbulence and violent

vibration during transportation.

How to unpack a module?

Remove the wrapping film around the box and separate the upper and lower boxes. The long side of the module to unpacked needs to be close to a solid support for about 15-20cm distance, the support could be a wall, rack or another unpacked module box of the same type, and then use scissors to cut all the packing strap of the outer box.
