# Remedies for Over-discharge of Household Energy Storage

## Overview

---

How do I prevent battery over-discharging?

To prevent over-discharging and mitigate its effects, follow these guidelines:  
Monitor Battery Levels: Regularly check the battery's state of charge (SOC) to avoid over-discharging. Use a BMS: Implement a reliable BMS to monitor and control the battery's voltage and current.

How to prevent self-discharge in storage?

Preventing self-discharge in storage is an effective strategy. We suggest storing batteries in a cool and dry environment. Heat accelerates self-discharge, so avoid leaving batteries in hot places like cars or near appliances. Also, consider investing in quality battery chargers that have a maintenance mode.

How to reduce battery self-discharge?

Heat accelerates self-discharge, so avoid leaving batteries in hot places like cars or near appliances. Also, consider investing in quality battery chargers that have a maintenance mode. These chargers can keep your batteries at an optimum charge level without overcharging, which helps reduce self-discharge.

What is the best method for discharge pretreatment of lithium ion batteries?

The safest and most effective solution is to connect resistors at both ends of the battery to consume the residual electric energy of the spent LIBs. However, due to different battery sizes, this method is not economically feasible. Based on this principle, two feasible methods have been derived for discharge pretreatment.

Which discharge method is most effective and environmentally friendly?

After careful evaluation, the flake graphite discharge method was regarded as the most effective and environmentally friendly discharge method of spent

LIBs.

How effective are different discharge media for preventing voltage rebound?

The effectiveness of different discharge media was studied. An over discharge method is proposed to avoid voltage rebound. The rapid development of new energy vehicles has exponentially increased the output of spent lithium-ion batteries (LIBs).
